

Baltimore Sailing Club Dinghy Classes. 2017

Baltimore Sailing Club at present has dinghy classes using three main hull types. They are the Topaz, the Laser and the RS200 hull types. Below are the current BSC progression boats. This year BSC has added the RS200 to the club dinghy classes after much research. This will be the class for adults and young adults for the foreseeable future. Already there are two RS 200 boats at the club and it is proposed to have the boats available for information and viewing at the club at Easter. Details will be posted here soon.
